

AedesX Smart Gravitrap

Seva Facility Services Pvt. Ltd.

The world's first
patented device
to tackle disease
transmitting
Aedes mosquitoes

Effective

Smart design attracts gravid (egg-laying) female *Aedes* mosquitoes and kills emerging larvae through intelligent electronic components.

Scientific

Negative phototaxis causes *Aedes* mosquito larvae to move away from light inside the trap.

Portable & Flexible

Uses AA batteries letting users to place it anywhere for managing *Aedes* mosquitoes.

Low-maintenance

Requires only water top-up for maintenance between battery changes.

Pesticide-free

Uses negative phototaxis and asphyxiation to continuously kill mosquito larvae without pesticides.

Codeveloped by Singapore's Pestroniks
Innovations and Asiatic Speciality Products
